T.C. Ministry of Health

- Developed an Angular project to serve as an UI to my PostgreSQL project. Created an interface which accessed some of the APIs.

- Developed a Spring Boot project with MongoDB database. Included some REST APIs. Mainly studied the difference between MongoDB and PostgreSQL projects.

- Developed a Spring Boot Project with PostgreSQL database. Included some REST APIs, Camunda workflows and Redis caching.

SOFTWARE INTERN
ANDASİS

Jun. 2020 - Aug. 2020

- Implemented simple Python scripts which create topologies for Mininet.

- Done research on ONOS, OpenFlow, SDN, Mininet, SNMP and OVS subjects.

- Created a Spring Boot demo project that performs CRUD functions using Onos REST API.

- Written an ONOS REST API documentation to satisfy company needs.

PROJECTS

PERSONAL PROJECT (SOLO)
